**Monitoring Requirements Not Met for Ford City Water Works**

Our water system violated one or more drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

*We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During November we failed to monitor for the following contaminants and therefore cannot be sure of the quality of our drinking water during that time.*

**What should I do?**

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, the required sampling frequency, how many samples we took, when samples should have been taken, and the date on which corrective action samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
Chlorine	Daily	30	11/01/25-11/30/25	11/01/25-11/30/25
Groundwater Rule	Daily	30	11/01/25-11/30/25	11/01/25-11/30/25

**What happened? What was done? When will it be resolved?**

Failure to Monitor or Report. Entry Point 101 Chlorine results were submitted late. Due 12/10/2025, submitted 12/15/2025
